INSTRUCTION FOR LAYOUT – DESIGN

One of the most important thing for good print and the good final product is appropriate file-design. Because of that, please send us file and design in our email address or via we-transfer on:

<mailto:office@gmt.rs>

Your file -designs can deliver on a CD or USB-in person or by express post. Please follow the instructions provided.

Format preparation for digital printing:

- **Corel Draw (.cdr)**
- **Vector EPS (.eps)**
- **Adobe Illustrator (.ai)**
- **TIF on 150dpi resolution,on original dimension**
- **PDF**
- **Preferred colors should be represented in% by CMYK palette**

If you do not have adequate preparation-design, our design studio can offer practical solutions. Technical processing and preparation in our design studio press bigger than 10m2 are free. For smaller sizes, technical processing of files (conceptual design, tracing the motives, scanning, finishing, correction) will be paid at the current price list.
